Yarn, string

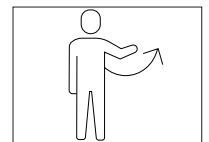

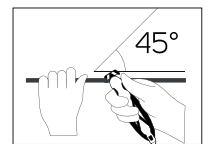

Zip ties

Cutting Safety

45° ANGLE
LESS FORCE = EASIER WORK = LESS RISK OF INJURY

- Always cut in a 45° angle for an easier and safer cutting experience.
- When cutting corrugated cardboard, tilt the knife slightly sideways. This significantly reduces the necessary force.
- Ensure that films and tapes are always taught, before you cut them. The blade will cut your material better.
- Always cut away from your body

Signs of Wear & Tear

- Worn, gouged or chipped guard
- Worn tip
- Worn, dull or chipped blade
- Requires more force to cut
- Creates jagged cuts

MAINTAIN YOUR CUTTING SPEED & REPLACE BLADE HEAD WHEN WORN

the cutting edge in safety

KLEVER

Safety Concealed Cutter

Two Sided Head

KLEVER EKO KUTTER

The Original Klever Cutter is now eco-friendly with the **KLEVER EKO KUTTER**. Featuring a handle made from 75% recycled plastic makes this an ideal solution to support your company's sustainability objectives. This dual-sided, concealed blade safety cutter reduces cut injuries and damaged goods, offers 2x the usage, and brings new life to pre-consumer plastic waste. The KLEVER EKO KUTTER is made with advanced plastic polymers and a high-quality carbon steel blade to offer the same strength and durability as the original Klever Cutter, is disposable and comes with a practical eyelet for lanyard fastening or hanging.

Features & Benefits

- Handle made from 75% pre-consumer recycled plastic
- Recessed blade reduces cut injuries and damaged goods.
- Cuts boxes, film, tape, and many more applications.
- Custom logo printing
- Small, convenient, and durable with high quality carbon steel blade
- Made with advanced plastic polymers and a high-quality carbon steel blade
- Disposable and ambidextrous
- Made in USA with high quality German blade
