Cutting Safety

45° ANGLE
LESS FORCE = EASIER WORK = LESS RISK OF INJURY

- Always cut in a 45° angle for an easier and safer cutting experience
- When cutting corrugated cardboard, tilt the knife slightly sideways to reduce necessary force
- Ensure that films and tapes are always taught before cutting them, the blade will cut your material better

Signs of Wear & Tear

- Worn, gouged or chipped guard
- Worn tip
- Worn, dull or chipped blade
- Requires more force to cut
- Creates jagged cuts

safety cutters

The active antimicrobial component is part of the formulation, so it won't wash off or wear away!
This is not a coating or treatment — it's an integral ingredient!
